9. SCHOLARLY AND PROFESSIONAL ACTIVITIES

(a) Areas of special interest and accomplishments

My research has focused on the empirical testing of the impact of tax and transfer policy on the economy. Empirical research into the impact of the tax and transfer system provides measurements that are useful both for those interested in furthering the theory of social insurance and the public sector, and for those who are charged with designing the system. My research can be categorized into four themes: the elderly, children, female labour supply, and political economy.
